PROBIOTICS IN ANIMAL NUTRITION

Production, impact and regulation

ANIMAL PRODUCTION AND HEALTH

PROBIOTICS IN ANIMAL NUTRITION

Production, impact and regulation

Recommended Citation

FAO. 2016. *Probiotics in animal nutrition – Production, impact and regulation* by Yadav S. Bajagai, Athol V. Klieve, Peter J. Dart and Wayne L. Bryden.
Editor Harinder P.S. Makkar. FAO Animal Production and Health Paper No. 179. Rome.

Authors

Yadav S. Bajagai, Athol V. Klieve, Peter J. Dart and Wayne L. Bryden
School of Agriculture and Food Sciences, The University of Queensland, Australia

Editor

Harinder P.S. Makkar

Contents

Preface	v
Acknowledgement	vii
Introduction	1
Scope of the document	3
Probiotics: definition and classification	5
Definition	5
Classification	5
Micro-organisms used in probiotics	7
Manufacture of probiotics	11
Selection of microbial strains	11
Fermentation	11
Growth media	11
Growth conditions	12
Fermentation methods	12
Drying	13
Freeze drying	13
Spray drying	13
Mode of probiotic action	15
Modification of the microbial population of the GIT: promoting favourable GIT microflora	15
Increase in digestion and absorption of nutrients	17
Production of antimicrobial substances	17
Alteration in gene expression in pathogenic micro-organisms	18
Immunomodulation	18
Improvement in innate gut immunity through restitution of intestinal barrier function	19
Stimulation or suppression of immune response	19
Colonization resistance	21
Probiotic application in different livestock production systems	23
Probiotics in poultry nutrition	23
Growth rate	23
Feed intake and feed efficiency	24
Carcass yield and quality	28

Nutrient Digestibility	28
Intestinal histomorphology	29
Control or prevention of enteric pathogens	29
Egg production and quality	31
Probiotics in pig nutrition	32
Growth rate and feed use efficiency	32
Health	35
GIT microbial population	36
Probiotics in ruminant nutrition	37
Milk yield	37
Growth	38
Nutrient digestibility	39
Health	39
Rumen fermentation	42
Safety of probiotics and potential public health risks	45
Risk associated with probiotics	46
Assessment of risk	46
Safety of microbial genera commonly used as probiotics	48
<i>Lactobacillus</i> and <i>Bifidobacterium</i>	48
<i>Bacillus</i>	49
<i>Enterococcus</i>	50
Antibiotic resistance associated with probiotics	50
Antibiotic resistance in <i>Lactobacillus</i>	51
Antibiotic resistance in <i>Bifidobacterium</i>	52
Antibiotic resistance in <i>Bacillus</i>	52
Labelling of probiotics used in animal feed	55
Global regulatory status of probiotics in animal feed	57
Codex Alimentarius Commission	57
United States Food and Drug Administration	57
Generally regarded as safe (GRAS)	60
European Food Safety Authority (EFSA)	60
Regulation of probiotic labelling	61
Conclusion	63
References	65
