FAO, CECODE & FAUSAC

[Food security, sustaining peace and gender equality: conceptual framework and future directions](#)

Food security affects peacebuilding and gender equality, notably through employment markets and social cohesion. This study recommends that nutrition interventions support individual agency, work with informal governance structures and act on gender roles. (56 pp.)

[Lineamientos y recomendaciones para la implementación del Marco de Sendai para la Reducción del Riesgo de Desastres en el sector agrícola y de seguridad alimentaria y nutricional](#)

A regional review of food security and nutrition, with recommendations on applying the Sendai Framework for disaster risk reduction, notably by strengthening institutions and using natural resources sustainably, to improve climate adaptation and risk management. (Santiago, 46 pp., available only in Spanish) FAO & UNISDR

Guidance notes: Framework for Action for Food Security and Nutrition in Protracted Crises (CFS-FFA)

This series covers nutrition, energy, land, livestock, gender and other key areas in FAO's work in protracted crises. It raises awareness about the CFS-FFA and FAO's role in making it operational. Now available in French.
