Register for a demo and one-week trial on Euromonitor's Passport

[Euromonitor International's Passport](#) is a global market research database providing data and insight on industries, economies, and consumers in more than 200 countries with the scope of analyzing market contexts and identifying future trends.

The data is collected by over 800 researchers around the world and helps organizations and businesses to:

- Investigate how consumers live and which factors influence life choices;
- Identify links between socioeconomic indicators such as GDP, income, population and their connection with industry performance.

OUR RESEARCH SOLUTIONS

Passport
Passport is our syndicated global research database offering shared access to internationally comparable market research quickly and cost-effectively.

Passport advances understanding of the global industry and economic landscape in more than 200 countries, providing actionable insight to support business growth.

EUROMONITOR INTERNATIONAL

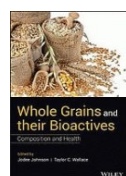

Euromonitor International is offering FAO staff an exceptional training session and a one-week trial on the Passport database in November. **If you are interested in participating, please write us at fao-library-reference@fao.org before Wednesday, November 11th. After the training all participants will receive a login to access the database for the duration of one week.** Kindly also note that the Library is only acting as an intermediary and that the cost of a possible future subscription will have to be shared by interested divisions.
