

## HIGHLIGHTS

**DIGITAL REPORT NOW AVAILABLE IN SIX LANGUAGES**  
**The State of Agricultural Commodity Markets 2022 – The geography of food and agricultural trade: Policy approaches for sustainable development**

The 2022 edition discusses how trade policies, based on both multilateral and regional approaches, can address today's challenges for sustainable development. It indicates that multilateral and regional trade agreements can facilitate the process of making trade an avenue for growth, but that the gains of trade are distributed unevenly.

**DIGITAL REPORT NOW AVAILABLE IN SIX LANGUAGES**  
**The State of World Fisheries and Aquaculture 2022 – Towards Blue Transformation**

The 2022 edition shows that total fisheries and aquaculture production reached a record of 214 million tonnes in 2020, which means the sector will play an increasingly important role in providing food and nutrition in the future.

**FAO resources on food loss and waste**

On the occasion of the [International Day of Awareness of Food Loss and Waste](#) (29 September), have a look at a selection of FAO titles exploring the linkages between food loss and waste and food security, and suggesting ways to address the situation while improving nutrition and environmental sustainability.

**Discover one of FAO's most translated publications**

International Translation Day (30 September) is an opportunity to promote multilingualism and to discover one of FAO's most translated publications: the Code of Conduct for Responsible Fisheries.

**Safety at sea: no sustainable fisheries without it**

World Maritime Day also falls on 29 September. Commercial fishing is considered one of the most hazardous occupations. Review FAO's selection of resources advocating for improved practices and policies on safety at sea in the fishing sector.

**Cotton, weaving a better future**

The cotton sector contributes significantly to the economies of many low-income countries, as a source of employment and livelihood. Ahead of World Cotton Day (7 October), find out more about this important commodity with a selection of FAO publications.

## BOOKS

### CLIMATE CHANGE

**Delivery of climate services to last mile users: challenges and opportunities for scaling**

This book describes the use of loudspeakers as a source of weather information. It shows that loudspeakers have a wide reach and are valued by farmers. Farmers use the weather information when choosing crop variety and may change their water management practices based on the information.

(Vientiane, 64 pp.) FAO, Bioversity International, CIAT, MAF & MONRE

DOI: <https://doi.org/10.4060/cc1929en>

### ECONOMIC AND SOCIAL DEVELOPMENT

**Directrices de empleo seguro y saludable para las mujeres trabajadoras de la industria bananera en América Latina**

The document aims to contribute to improving the working conditions of women in the banana industry throughout Latin America, through guidelines for the safe and healthy employment of women workers in an industry.

(112 pp.)

DOI: <https://doi.org/10.4060/cc1213es>

### FISHERIES AND AQUACULTURE

**Development of a credit and insurance programme for small-scale fisheries in the Philippines**

This circular indicates that further capacity needs to be built both on the supply side (financial service providers, including insurance companies) and the demand side (fishers and fisherfolk organizations) so as to boost the financing of sustainable fishing practices in the Philippines.

(44 pp.) FAO Fisheries and Aquaculture Circular

DOI: <https://doi.org/10.4060/cc1953en>

**Report of the Technical Consultation on Voluntary Guidelines for Transshipment. Rome, 30 May–3 June and 7 July 2022**

The Voluntary Guidelines aim to provide assistance for developing new transshipment regulations, revising existing regulations, and integrating these within the broader regulatory framework. The Technical Consultation successfully completed the review of the draft and adopted it.

(40 pp.) FAO Fisheries and Aquaculture Report

DOI: <https://doi.org/10.4060/cc1964en>

**Legal report on the ecosystem approach to fisheries – An analysis of the ecosystem approach to fisheries in selected national policy and legal instruments – EAF-Nansen Programme reports**

These reports on the EAF used the diagnostic tool to assess the alignment of selected policy and legal instruments of the countries with an EAF. These assessments analyse the extent to which 82 EAF legal requirements, which are considered the minimum standards in legislating for an EAF, are reflected in the countries' policies and legislation relevant to the fisheries sector of the country and other relevant sectors (such as environment, wildlife, ecosystems and maritime affairs).

**Guinea**

(56 pp.)

DOI: <https://doi.org/10.4060/cc2101en>

**Guinea-Bissau**

(56 pp.)

DOI: <https://doi.org/10.4060/cc2100en>

**Senegal**

(52 pp.)

DOI: <https://doi.org/10.4060/cc2107en>

**FORESTRY**

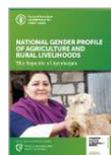

**Forest communities in the face of COVID-19 crisis – The role of social organization in response, recovery and building back better**

This paper highlights that social organization and collective action achieved through locally accountable organizations have been key in addressing the COVID-19 crisis. Social responses included the increased harvesting of wild foods and the provision of food aid by locally accountable organizations.

(96 pp.) Forestry Working Paper

DOI: <https://doi.org/10.4060/cb7333en>

**GENDER**

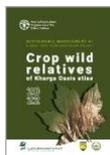

**National gender profile of agriculture and rural livelihoods – The Republic of Azerbaijan**

This study shows that the absence of sex-disaggregated records on land ownership poses problems for determining women's representation as agricultural landowners. It suggests amending or drafting laws to ensure that women and men have equal rights to, access to and control over natural and productive resources.

DOI: <https://doi.org/10.4060/cc2041en>

**PLANT PRODUCTION AND HEALTH**

**Crop wild relatives of Kharga Oasis atlas – Sustainable management of Kharga Oasis agro-ecosystems project**

Crop wild relatives (CWR) are considered enormous reservoirs of genetic variation and play a critical role in addressing the challenge of global food security. This publication describes the different CWR in the Kharga Oasis, including the Poaceae, Fabaceae and Brassicaceae families.
