

AGORA increases access to valuable sources now boasting up to 74,000 total resources

AGORA continues to expand its access to thousands of valuable information resources covering agriculture, fisheries, food, nutrition, and more in public institutions across the world, now featuring up to 74,000 total resources including subscription based scientific journals and ebooks. Subscription-based journals and major scientific books remain important sources of high-quality scientific information that are crucial in advancing higher education, improving the ability to share findings, and informing public policy decisions.
